w3.degree

Verifiable credentials • Degree verification • Seven-figure strategic asset

The verifiable degree brand for the next internet

A premium two-character W3 identity built for platforms where degrees are instantly veri
trusted by default — across employers, borders, and institutions.

Why this domain wins

- Two-character W3 root: short, memorable, logo-ready
- "Degree" is synonymous with credentials + verification
- Category-clear extension: authority without explanation
- Works Web2 today; evolves into verifiable credentials-native
- Designed as a platform umbrella (issuance, API, wallet, registry)

Best-fit use cases

- Degree verification APIs (employers, HR, complia
- Issuer portals (universities, training organizations
- Credential wallets (portable proof of education &
- Education-to-employment pipelines (verified path
- Credential marketplaces (micro-credentials, rep

Degree verification, simplified

- Issue once: credentials are minted/recorded at the source (issuer).
- Verify anywhere: employers and partners validate authenticity in seconds.
- Reduce fraud: tamper-evident records and standardized verification flows.
- Improve portability: holders carry proof across platforms and geographies.

Acquisition

This domain is positioned as a seven-figure strategic asset for a category leader.
Process: Qualified inquiry → (Optional NDA) → Terms → Escrow → Standard transfer.
